

Kind reminding for clients:

1. Even low price gives the short satisfaction on the printer itself, it will only bring the disasters when you use it for its low quality
2. It is unworthy to buy low quality products only for its low price. The loss will outweigh the gain, because what you bought cannot meet your demand.
3. Only when you are foresighted enough to invest on high-quality and competitive products and with the good after-sale service, double or triple return can be achieved than the average industry standard.

Focus on
high speed UV printing,
to meet the customer's
satisfaction

Production Speed up 30%
New KM1024A Print Head

- Eco-solvent Series (EPSON)
- Solvent Series (KONICA MINOLTA)
- UV Series (KONICA MINOLTA)

Zhejiang Yurong Digital Printing Technology Co., Ltd.

ALLWIN brand was established in 2007, which is a printer manufacturer of R&D manufacturing, sales and service. **The brand value is stable&high quality printing and the target customers are professional processing producers.** In 10 years, ALLWIN brand quickly becomes the high-end brand of made-in-China solvent and eco solvent printer and is well recognized by professional customers for its clear positioning of target customers' demand, integration of internal and full chain resources, focus on stable&reliable&durable industrial products.

At the beginning of 2017, a new modern factory building with an area of 35,200 square meters was put into use. At the same time, a number of executives with backgrounds in international industrial enterprises were hired to join the company to enhance the management capabilities of ALLWIN in new product development and product manufacturing processes. At present, **ALLWIN has successfully provided mass-produced OEM products for a well-known Japanese international company.** The products are continuously flowing to the international market through their sales channels.

ALLWIN pays great attention to R&D investment and has a number of national inventions, software copyrights and utility model patents. In 2000-2024, due to good reputation among customers and steady growth in sales, **ALLWIN is the only company won the title of Excellent Partner in China from KONICA MINOLTA for 16 consecutive years.**

ALLWIN will further focus on the core categories and provide products and service that keep pace with the times and achieve customers' leading position in the industry.

- ★ 2012-2014 3 Invention Patents, 21 utility model patents
- ★ 2015-2017 1 Invention Patent, 19 utility model patents
- ★ 2018-2024 5 Invention Patents, 16 utility model patents

For its stable quality, and excellent sales, ALLWIN is the only company won the title of Excellent Partner in China from **KONICA MINOLTA** for 16 consecutive years.

Focus on high speed UV printing, to meet the customer's satisfaction

ALLWIN Patented Technology

Nozzle Laser Detection and Compensation

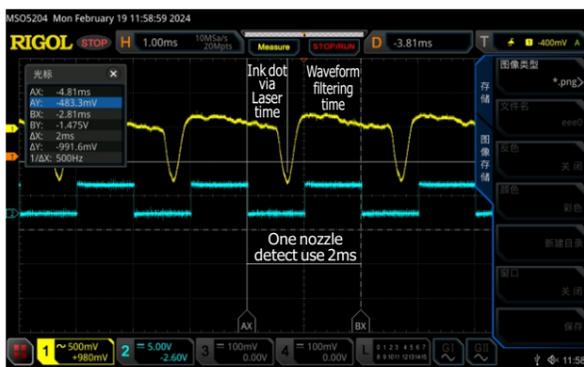

Focus on high speed printing,
to meet the customer's satisfaction

◆ Laser Detection Theory

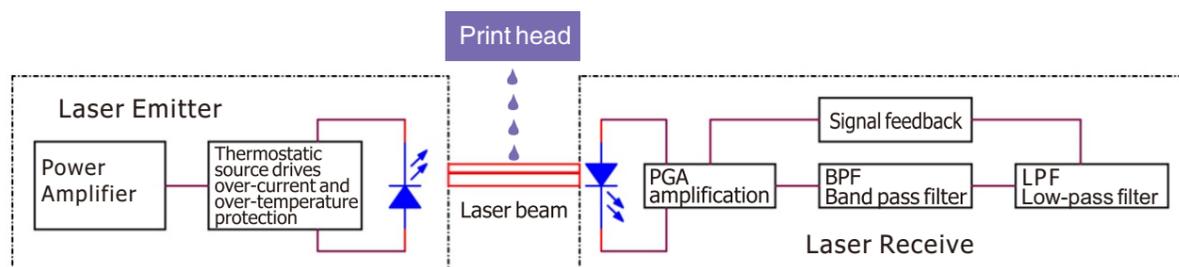

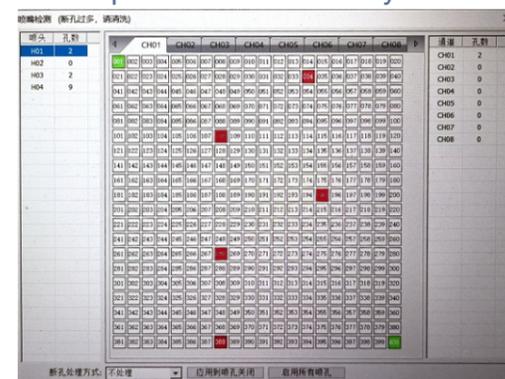

Use Laser to detect print head nozzles fire ink or not. Software automatically calculate the compensation position according to the detection. Then printing software will use normal nozzle to print instead of the missing nozzles in next PASS. This will make printing effect like new print head.

Print head amount	Detection time
1 nozzle	0.002s
1 head	3200 Nozzle × 0.002 = 6.4s
2 head	6400 Nozzle × 0.002 = 12.8s
4 head	12800 Nozzle × 0.002 = 25.6s
6 head	19200 Nozzle × 0.002 = 38.4s

◆ Laser Detection schematic diagram

◆ Detect result will map in software, Red position shows the nozzles without firing, when printing will compensate automatically.

After the machine is used for a period of time. Head cap will not perfectly match with printhead during cleaning if not replace new one, few nozzles will not work properly after cleaning. In addition when machine works longer, more nozzles will be totally blocked.

If print head missing nozzle will make output jobs with banding and low quality, especially in solid color and gradient color job. Directly cause customer dissatisfaction or loss of orders, affect customer loyalty and direct economic losses, and further affect the development and growth of enterprises.

ALLWIN Patented technology - laser detection of nozzle blockage and automatic compensation technology help you solve the problem. Through this technology, the quality of each picture is comparable to that of the new nozzle. Few missing nozzles can print almost the same quality of the new nozzle, to achieve large orders.

* Head Nozzles missing make banding

* Use Compensation output near perfect

Machine much more Convenience to use, print perfect quality job

ALLWIN Patents Leading Position in China

ALLWIN ONE TIME SUCCESSFUL HEAD CLEANING SYSTEM

More Eco-solvent printer heads, faster production speed, increase probability of nozzle missing.

Multi-heads printers not easy to maintenance heads when nozzle missing, frequent maintenance affects production efficiency

Frequent head maintenance wastes ink , reduces the production efficiency. You need one time successful cleaning head.

NOZZLE LASER DETECTION AND COMPENSATION SYSTEM

If print head missing nozzle will make output jobs with banding and low quality, especially in solid color and gradient color job. Directly cause customer dissatisfaction or loss of orders, affect customer loyalty and direct economic losses, and further affect the development and growth of enterprises.

ALLWIN Patented technology - laser detection of nozzle blockage and automatic compensation technology help you solve the problem. Through this technology, the quality of each picture is comparable to that of the new nozzle. Few missing nozzles can print almost the same quality of the new nozzle, to achieve large orders.

*Head Nozzles missing make banding

DTF6002 DTF PRINTER

UV 9060 FLATBED PRINTER

▲ Fully Automatic Cycle Powder Feeding System

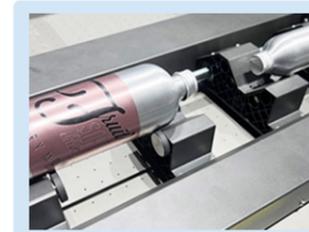

▲ Built-in Smoke Removal Device

▲ Fully Automatic Drying and Curing

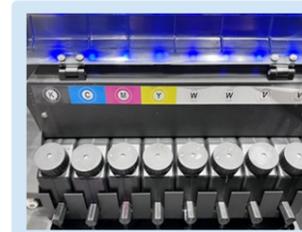

▲ Front Bezel Platform Heating Function

▲ Optional shaft for rotary printing

▲ Printer Ink Cartridges

▲ Continuous Ink System

▲ Air-cooled UV Lamp

Model	DTF6002 DTF PRINTER
Print Head	2pcs Epson I3200
Color	CMYKW
Print Thickness	0-3mm
Printing Accuracy	2400dpi
Max. Print Width	600mm
Printing Speed	12m ² /h
Applications	Suitable For All Kinds Of Fabrics, Leather, Bags, Shoes, Hats, Socks, Masks, Gloves, Plush Toys, Knitted Underwear, Swimsuit, Handicrafts And Other Industries.
Printing Environment	Temperature 25°C-30°C; Humidity 35%-65%
Power Voltage	AC220/±10V 50HZ-60HZ
Operation System	Windows 7, Windows 8, Windows 10
RIP Software	Photoprint / RIIN / Maintop
Picture Type	Tiff / Jpg / Eps / Pdf / Png / Ai / Psd
Printer Dimension	W2290*D1585*H1420mm
Packing Dimensions	W2240*D1710*H1120mm
Gross Weight	450KG
Net Weight	330KG

Model	UV9060 FLATBED PRINTER
Printhead	I3200 U1/ I1600 U1/ I3200 HD
Resolution	360dpi*720dpi
ColorPrinting Height	UP to180mm
Printing Weight	155kg
Printing Size	900mm*600mm
Printer Size	1996mm*1332mm*787mm
UV Curing System	Fans Cooling System
Lifting Function	Intelligent Carriage Lifting Function, Automatic Printing Height Adjustment And Measure Detect Function
Printing Platform	Vacuum Suction Platform
Printing Resolution	720dpi*1200dpi, 720dpi*1800dpi, 720dpi*2400dpi, 720dpi*3600dpi
Printing Speed	16m ² /h
Application Type	Glass, Acrylic, Ceramic Tile, Aluminum, Iphone Case, Plastic, Foam Board, Wallpaper, Wall Art, Sign Advertising, Metal, Paper, Wood, MDF, Furniture, Card, Marble, Golf Products, Gift & Promotion Products, Leather, PU, PMMA, PVC, PP, PE, PTFE, Plexiglass, Panels, Ceiling, Organic Board, Corrugated, Chevron Board, Fiberboard, Brick, Stone, Home & Office Decoration, Electric Appliances Panel, Pottery & Porcelain Tile, 3C Product, Oil Painting, Fresco, Sliding Door, Wedding Photography, Mark And Signs, Exhibition, Etc...
InkType	Import Soft LED UV Curing Ink / Rigid LED UV Curing Ink (No VOC)
Ink Capacity	1.5L*6 Color
Power Voltage	AC220/±10V 50HZ-60HZ
Control System	Windows 7, Windows 10, Windows 11 64Bit
RIP Software	Photoprint
Printing Environment	Temperature 20°C-25°C; Humidity 40%-60%
File Formats	PDF/JPG/IPEG/TIF/TIFF

HB1804UV / HB1806UV UV printer

Support EPSON I3200-U1 UV Print Head
LED UV INK CURE SYSTEM

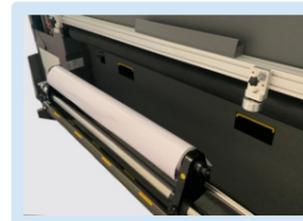

▲ Adjustable table vacuum pump

▲ Auto height adjustment, support 2-30mm

▲ Frontside and backside inbuilt table, Convenient for printing rigid materials

▲ 2 type media feed&collect system. Air shaft optional

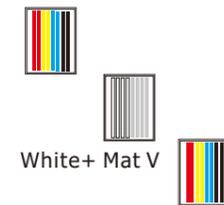

Mode	HB1804UV/ HB1806UV		
Media width/ print width	1850mm / 1800mm		
Head qty	4 head CMYK	6 head CMYK	6 head color white color

Equipped with professional external collecting system to ensure media drying fast with high-speed printing, convenient for post picture processing

1. Negative pressure system with electronic valve, easy to operate;
2. High quality THK mute double guide rails with linear motor ensure smooth production and high quality image printing request, Reduce maintenance costs;

3. The stepless adjustment system for the height of the carriage ensure printing of different materials thickness;
4. The design of the capping station with waste ink collection tank prevents machine pollution from waste ink, effectively keeps machine clean.

E520-8H 5M Giant inkjet printer

(Max printing width is 5285mm)

Focus on high speed printing,
to meet the customer's satisfaction

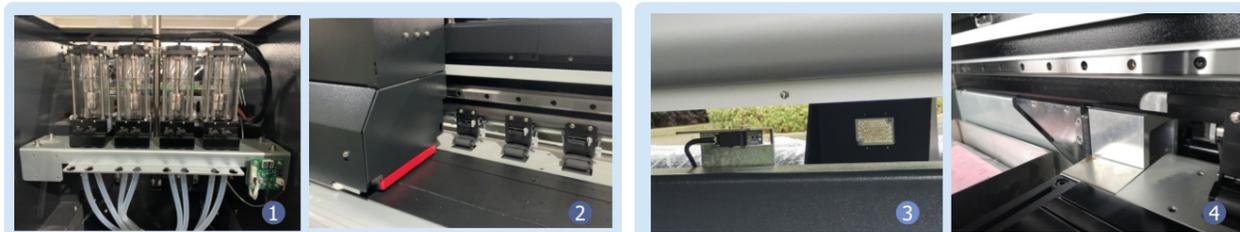

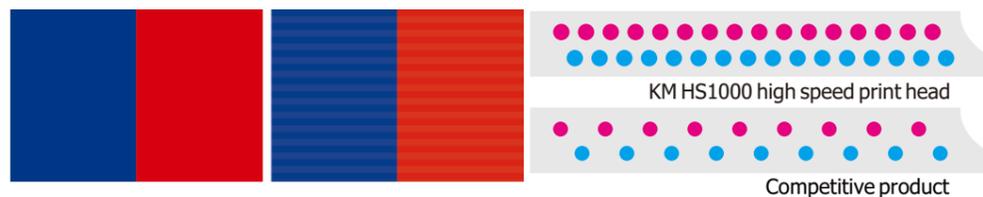

600m²/h KM-HS1000
280m²/h KM512I-30PL

* KONICA HS1000 print head use ALLWIN SO series ink support low pass printing without banding, speed up 50%

KM HS1000 high speed print head Advantages

1. Head length 72.2mm, each pass print length more 11%;
2. Each nozzle inkjet 30PL, ink volume 20% more, suit for solid color job;
3. Head physical precision 360DPI, 80% more, decrease banding in solid color printing.

1. Standard negative pressure system, more stable ink supply, less ink waste;
2. The print head anti-collision system can effectively prevent head damage during printing;
3. Adopt reflective photoelectric switch for all kinds of media feeding;
4. Full length guide rails effectively ensures carriage stable running when printing.

4/6 color high resolution high speed printing
suitable for mass production

1. Adopt metal raster with magnetic linear motion system, higher printing resolution and stability with longer lifespan;
2. To print standard size board, it can achieve continuous printing without pause and changing the board, which increases the production efficiency;
3. When print roll to roll, continuously print to the end of the roll without any waste, media loading is much easier.

**Focus on high speed UV printing,
to meet the customer's satisfaction**

- ◆ **Double Carriage Asynchronous Printing, Work as 2 unit single-sided machine**
- ◆ **Double Carriage Synchronous Printing, Work as high efficient one-step double-sided machine**
- ◆ **Independent heating system of sub ink tank, automatically ink self-locking after power off and self-unlocking when powered on;**
- ◆ **High density body frame structure;**
The whole machine uses frame and wallboard structure, benchmark precision milling and positioning processing, the whole machine is more stable, and the printing is more accurate;
- ◆ **Double guide rail design and linear motor system**
High precision assembled and adjusted for more stable carriage movement, reduce maintenance costs;
- ◆ **X Linear motor& metal raster movement system**
High precision printing and stable running
- ◆ **Water-cooled printing platform & adjustable suction area**
Standard equipped three-channel cold water circulation to meet customer high-temperature and longterm platform printing;
AC fan is used for suction, more stronger fan power to adapt to various materials, and through zone control meets customer's suction requirements for different picture size.

▲ Double guide rail, high precision assembled and adjusted for more stable carriage movement; (only double row mode)

▲ Print platform with water cooling system. The material is not wrinkle by LED UV lamp heating;

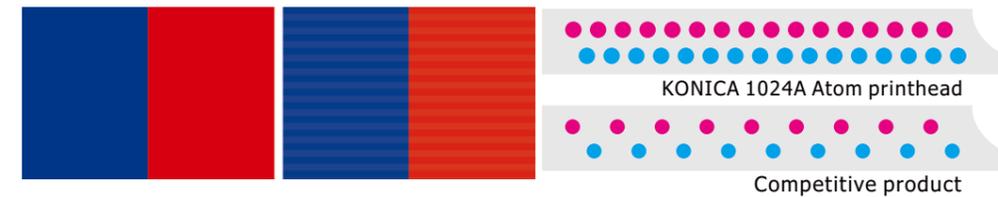

▲ Feeding & collecting system with air shaft roller, The whole roll media is printed in one shot;

▲ Feeding & collecting system with balance roller. It is suitable for printing on a variety of materials. (only double row mode)

KONICA 1024A Atom printhead compare with competitors

1. Head length 72.2mm, each pass print length 33% more;
2. Ink dot 6PL-18PL changeable (Max 24PL) each nozzle inkjet 20-60% more ink volume, more suite for solid color printing;
3. Head physical precision 360DPI, 20% more, decrease banding in solid color printing.

Machine Model	3.2M Pinch roller UV Machine
Printhead model	KONICA1024I-6PL/1024I-13PL/1024A
Printhead control	Software adjust printhead temperature and voltage
Printhead configuration	CMYK+W / CMYK+LCLM
Maximum printing width	3.2M
Maximum printing Resolution	1440 DPI, 2160 DPI
Ink type	UV ink
Color configuration	CMYK+W or CMYK+LCLM (Optional)
Ink supply method	Vacuum negative pressure automatic continuous ink supply
Drying device	UV LED Curing

3*YMCK/ YMCK+W+Varnish/ 2*YMCK+2W

KM9888H high precision print head

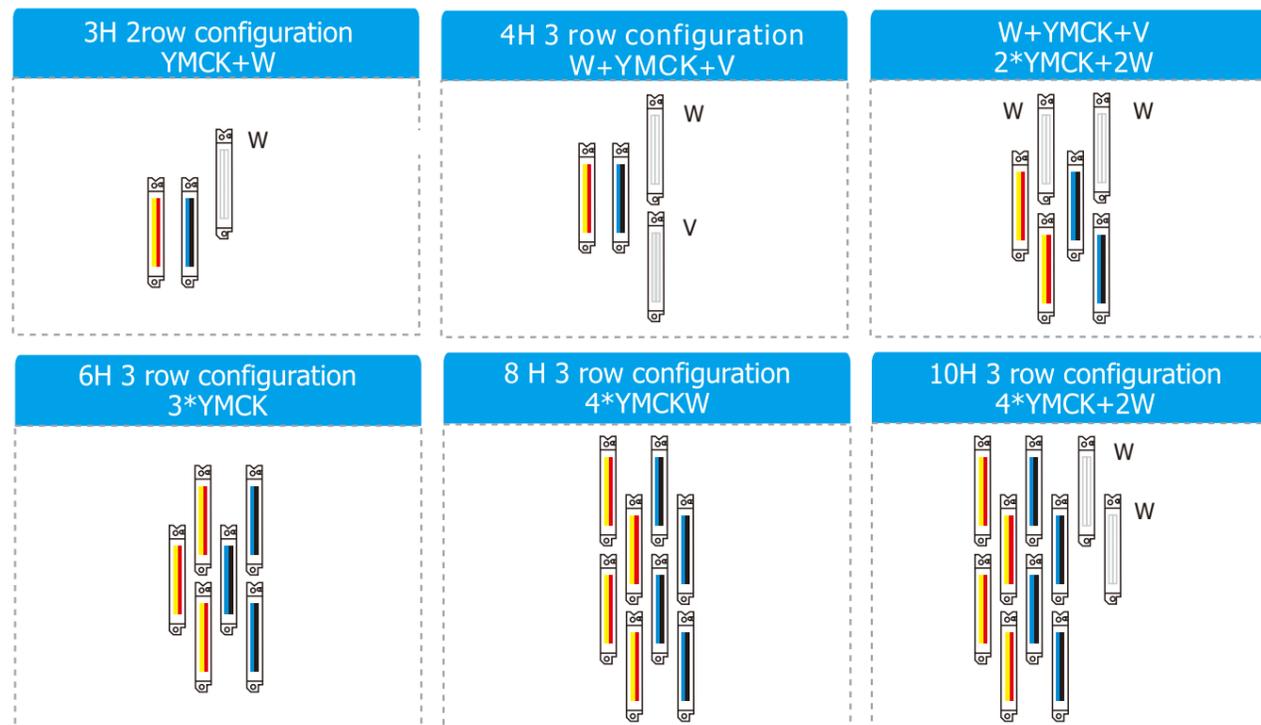

65m²/h (YMCK mode) **45m²/h** (high precision mode)

As UV flatbed printing enters an era of high precision and high speed demand, quality and efficiency are particularly important for printing processing enterprises. In response to market demand, Konica Minolta launch new printhead in 2025

New generation KM9888H High precision UV printhead

Nozzle amount	Min ink dot PL	Variable ink dot PL	Head coverage	Head physical precision
1776	5PL	8Level	75MM	600NPI 1H1C/1H2C

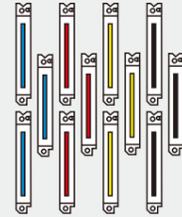

Machine model	UV2513/UV3225 (special order)	
Printhead brand	KONICA1024I-6PL/1024I-13PL/1024A	
Printhead arrangement	4C+1W ; 4C+4C; 4C+4C+2W ; 4C+4C+4C+4C (Optional as required)	
Color option	C/M/Y/K/LC/LM/W/V	
Printing size	1300mmX2500mm & 3200mm×2500mm	
Printing height	100mm (Customized height to 450mm)	
Printing media	Acrylic, wooden board, leather, phone shell, ceramic, glass, metal etc.	
Negative pressure control system	Double negative pressure / positive&negative pressure alternative control	
Printhead cleaning	Separate color purge , automatic cleaning system	
Platform type and resolution	Sectional aluminium alloy platform with scales, deviation less than 0.1mm	
Ink circulation system	White ink circulation, automatic stirring system to avoid printhead clog	
Ink tank volume&ink level alarm	4L ink tank with ink level alarm equipment	
Data transfer	USB3.0 standard port	
Rated voltage and power	220V/8000W	
Curing lamp	LED	
Servo motor	Imported motor	
Guide rail	Famous brand muted double guide rail	
Carriage height adjustment	Automatic	
Printhead protection	Intelligent anti-crash equipment	
Working environment	Temperature 20-35°C, humidity30%-70%	
RIP software	PHTOPRINT, CALDERA	
Picture format	Tiff, EPS, PSD, JPG, AI	
Package	Machine	2513: 4450(L)x2250(W)x1450(H)mm / 3220: 5400(L)x2500(W)xH1400(H)mm
	Package	2513: 4400(L)x2360(W)x1750(H)mm / 3220: 5500(L)x2200(W)xH1800(H)mm

NOTE: As products are keeping upgraded, any change of specification will not inform particularly. All rights are reserved by ALLWIN

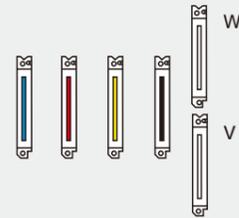

KONICA 3 rows of printheads, high speed color option

1. 3 rows of CMYK color option (UV 2513)

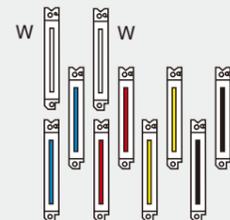

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	125m ² /h	83m ² /h
	4pass	97m ² /h	67m ² /h
	6pass	67m ² /h	37m ² /h

2. Color+white+varnish color option (UV 2513)

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	43m ² /h	36m ² /h
	4pass	33m ² /h	25m ² /h
	6pass	22m ² /h	17m ² /h

3. Double rows of CMYK+ WW color option (UV 2513)

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	83m ² /h	63m ² /h
	4pass	63m ² /h	42m ² /h
	6pass	42m ² /h	28m ² /h

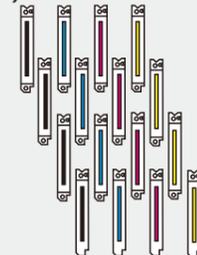

KONICA 4 rows of printheads, high speed color option

1. Double 6 colors+ double white option (UV 2513)

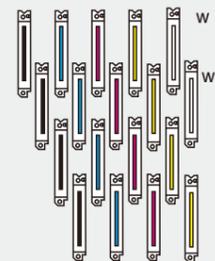

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	83m ² /h	63m ² /h
	4pass	62m ² /h	42m ² /h
	6pass	42m ² /h	28m ² /h

2. 4 rows of CMYK color option (UV 2513) suitable for mass production

Head Mode	Speed	Production mode	High-precision mode
KM Atom printhead (1024a)	3pass	144m ² /h	115m ² /h
	4pass	126m ² /h	83m ² /h
	6pass	84m ² /h	52m ² /h

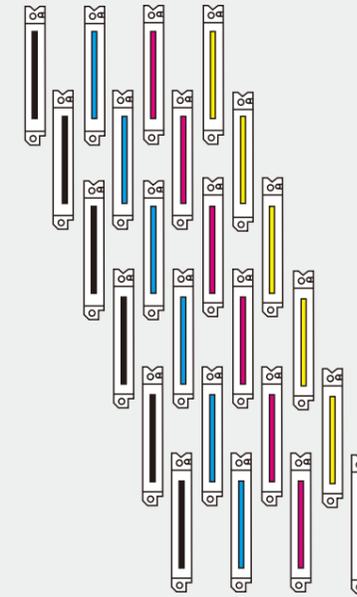

3. Color white color& full color free alternative option

According to the printing demand, the white and color mode can be switched at will.
When there is no need to print white ink, 12 printheads full-color&high-speed printing can be achieved; if white color printing is required, 8 printheads in two rows of color inks + 2 printheads in two rows of white ink and 10 printheads of white and color can print simultaneously.

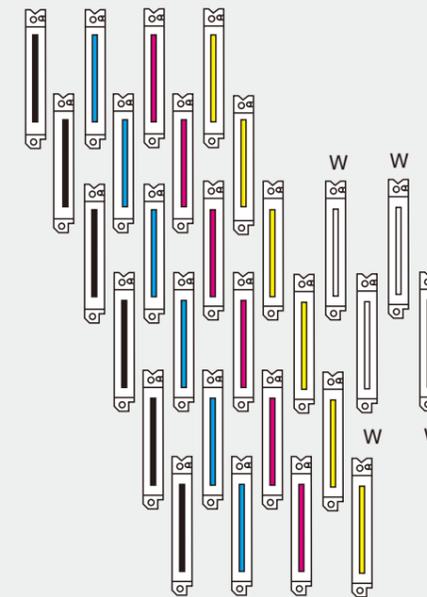

6 row print head solution (KONICA HS 2000/1024A Atom printhead)

①. 6 row 4 color/ 4 row 4 color solution (CMYK)

Speed	Production mode	High-precision mode
3pass	235m ² /h	160m ² /h
4pass	180m ² /h	120m ² /h

②. 6 row Color white color option (CMYK W CMYK)

Speed	Production mode	High-precision mode
3pass	100m ² /h	50m ² /h
4pass	70m ² /h	35m ² /h
